

# What is the Circular Economy?

The circular economy is an economic system aimed at reducing waste and favouring the reuse of resources, extending the useful life of materials.

## Who are we?

We are a European consortium of six institutions from Germany, Belgium, Italy, Slovenia and Spain, led by the Fundación Laboral de la Construcción.

This project is funded by the European Commission (N. 2020-1-ES01-KA202-083246). The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

**Green Growth**

## What are we looking for with Green Growth?

**Green Growth** aims to establish a sectoral strategy that positions the circular economy as a transversal subject within construction training.

To train **trainers** in circular economy to encourage the practical application of this model in the classroom.

Create tools that bring the circular economy closer to construction **trainers**.

Strengthen **social** and **environmental** awareness among construction workers and SMEs.

To help consolidate a **strategy** for the inclusion of circular economy principles in VET schools.

## What can you get from Green Growth?

### Handbook

for trainers about the circular economy in the construction sector.

### Course

for trainers in the sector about circular economy competences.

### App

for operators and SMEs for the application of the circular economy in renovation/rehabilitation works.

### Roadmap

for the adoption of the circular economy in training centres.

## The circular economy model replaces the traditional linear model based on...
